- Find out how OptimoRoute™ can help your business at OptimoRoute.com.

HANDHELD ORDER FORM

We are very excited to offer an affordable solution for equipping your trucks with a mobile app!

We have worked years to put together a solution at a reasonable cost. It is by far the lowest available on the market today—and we have been able to do it with only minimal up-front costs!

On top of that, we have taken great care to ensure that it is simple and straight forward.

We are confident the value you will get from this product will far exceed your costs.

HOW IT WORKS

Set Up

- Return this WAM-Handheld Order Form.
- We will call you to schedule your installation and install your software.
- We will have the equipment company call you to get you set up with them (Optimoroute option).
- Once your equipment is installed, we will train you and your drivers.
- You are ready to go!

Daily Procedure

- Run daily routes sheets as normal.
- This information gets uploaded to our WWS. From there, it goes to your drivers. Specifically, it will get downloaded to their Android, iPhone or Windows tablet.
- Drivers complete their route.
- The completed route information gets sent back to our WWS, then to your system.
- The handheld information is used to update all parts of the system (Route Totals, Daily Usage, extra charges posted to customer accounts, pictures moved to customer accounts, etc.). Once downloaded, you have the option to resequence the route in driver pickup order.

HANDHELD AUTHORIZATION

FORM 3-102

I, _____, hereby authorize WAM Software, Inc. to charge the credit card or checking account I have on file with them for the WAM-Handheld services after the trial period has ended.

There are two costs associated with having the Handheld:

Non-WAM Costs

- First is the equipment. Any Windows, Android or Apple tablets will be purchased by your company. This would also include any accessories, such as power cords, mounts, et cetera.
- Next is the app, if you choose Optimoroute. As noted on page two, it will cost \$39-\$49 per month per truck. You would pay them directly.

WAM Costs

- The OptimoRoute option is \$4.00 per route for each day used. This option has a 30-day trial period.
- The WAM option is \$4.00 per route for each day used plus \$30 per vehicle per month. This option has a 90-day trial period.

We bill these charges weekly. For example, if you have OptimoRoute and run Route 31 on Monday, Wednesday, and Friday for the week and Route 17 on Tuesday, you will be charged \$16.00 for the four routes that have been uploaded to the WWS that week.

I understand and agree to all terms and conditions regarding the use and payment of the WAM-Handheld. I authorize use of the payment method I have on file for WAM-Handheld services. As I am only charged when I use the WAM-Handheld services, I understand that cancelling authorization of these services requires that I discontinue using them and that as long as I continue using them, I am authorizing payment for them. I agree to pay all charges incurred in another manner if my payment is declined. I understand that I must have a valid payment method on file or my ability to access WAM-Handheld services may be suspended. I understand that I must have an active WAM Web Server subscription in order to utilize the WAM-Handheld System.

By signing this form, you are authorizing us to charge any Handheld services used each week via the payment method you have on file.
